OBJECTIVE

Aspiring Full-Stack Developer with expertise in Java, Python, Spring Boot, Angular, and Node.js. Passionate about building scalable applications, problem-solving, and software development. Skilled in both frontend and backend technologies with hands-on experience in database management, API integration, and web application development.

PROJECTS

Library Management System (Java Swing & MySQL)

- Developed a desktop application for a library system using Java Swing.
- Implemented QR code and userid, password, and role based authentication for user check-ins.
- Enabled real-time book tracking, student/staff/admin roles, and transaction management.

Project Management Software (Spring Boot & Angular)

- Built a full-stack project management tool for handling bug tracking and team collaboration.
- Implemented role-based authentication and task assignment features.
- Used Spring Boot REST APIs with Angular frontend for seamless interaction.

BharatDaily (Angular & API Integration)

- Developed a news portal using Angular with live API integration for fetching news articles.
- Implemented category-based news filtering and real-time updates.
- Designed a responsive UI using Angular Material.

Portfolio Website (HTML, CSS, JavaScript)

- Built a personal portfolio website showcasing projects and skills.
- Implemented interactive UI using Angular .
- Implemented Backend using Node.js .
- Fully responsive and optimized for mobile & desktop users.
